DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 09/14/2007.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The recitation of "is capable of" in lines 2 and 6 of The abstract is changed to - - executes - -.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest the arrangement of a semiconductor memory which is capable of executing at least two application programs that comprising a first storage unit operable to store data relating to a first application program; a second storage unit operable to store data relating to a second application program; and especially, a level identification unit operable to identify respective security levels of the first and second application programs for the data relating to the first and second application programs, based on a criterion for identifying

a security level of an application program for data relating to the application program;
and a duplication unit operable to duplicate the data stored in the first storage unit and to store the duplicated data into the second storage unit, without taking the data outside of the semiconductor memory, in the case where a relationship between the two security levels identified by the level identification unit meets a predetermined condition as recited in claims 1 (and its dependents) and 9-12.

The previous cited references Hosogoe et al. (US 6,766,961 B2), Taylor (US 5,578,808), Gochi (5,055,661) teach an integrated circuit (IC) card that having a plurality of memory units operable to store different application data.

The previous cited references Johnson et al. (US 5,813,009), Bradley et al. (US 6,957,256 B1) and Yakir et al. (US 2004/0049513 A1) teach a data management system with security level access.

However, without the benefit of applicant's teaching, there is no motivation for one of ordinary skill in the art at the time the invention was made to selectively combine the features of the prior art in a manner so as to create the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
